

## Develop The Web Application Using Node-RED

Team ID	PNT2022TMID00858
Project Name	IOT-BASED BABY MONITORING SYSTEM SURVEY USING THE RASPBERRY Pi

Aim: Develop the web application using Node-RED

Steps Followed:

- Opened a Node-RED project

- Added code to get child location in python

```
import json
import wiotp.sdk.device
import time

myConfig = {
    "identity": {
        "orgId": "hj5fmy",
        "typeId": "NodeMCU",
        "deviceId": "12345"
    },
    "auth": {
        "token": "12345678"
    }
}
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()

while True:
    name= "Smartbridge"
    #in area location

    latitude= 17.4225176
    longitude= 78.5458842

    #out area location

    #latitude= 17.4219272
    #longitude= 78.5488783
    myData={'name': name, 'lat':latitude,'lon':longitude}
    client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
    print("Data published to IBM IoT platform: ",myData)
    time.sleep(5)

client.disconnect()
```

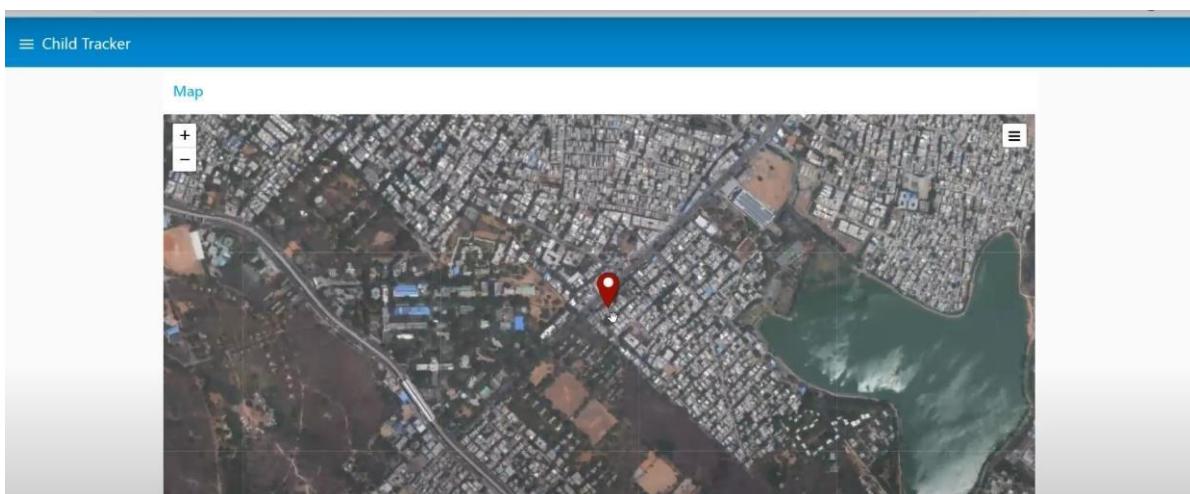

- Created the GeoFence

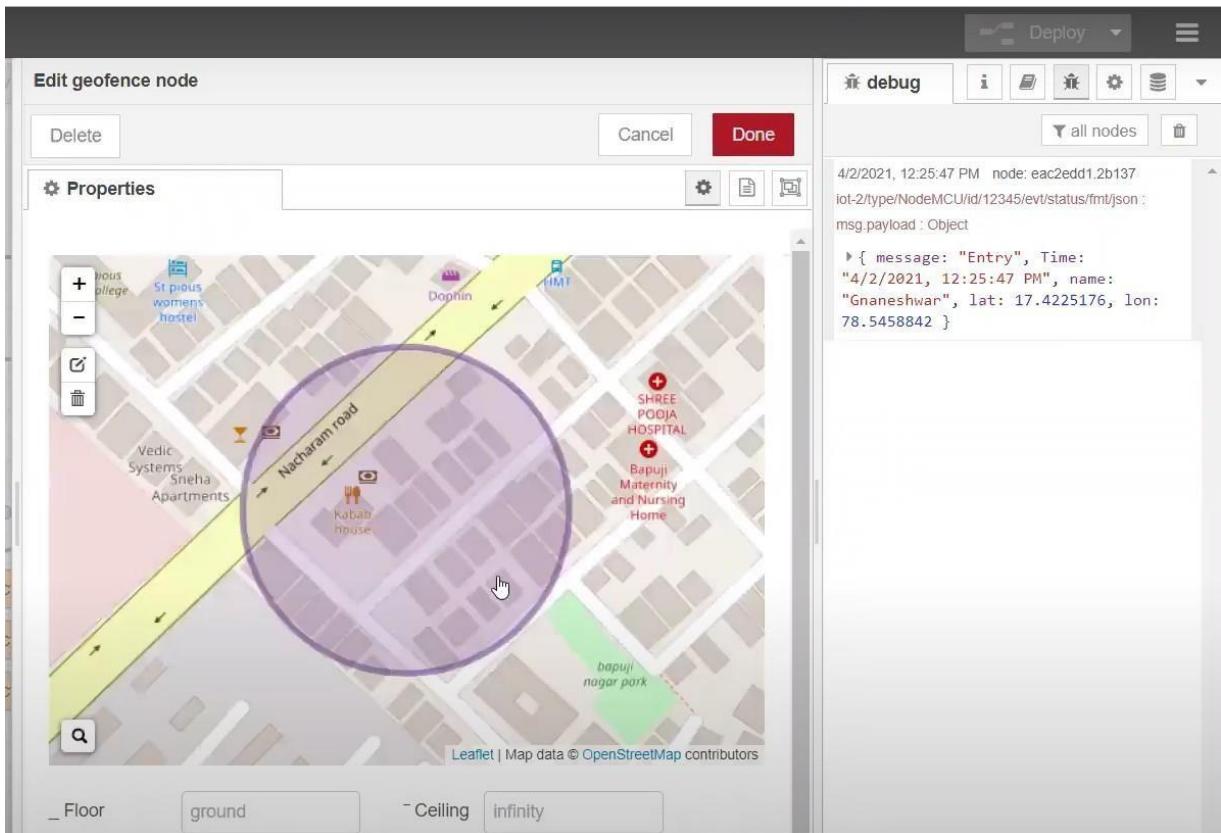

- Editing the HTTP Request URL

- Located the child

- Created the geofence node

- Python script sending requests to IBM Cloud

The screenshot shows a development environment with an 'Editor - C:\Users\HP\Desktop\child.py' window and an 'IPython console' window. The code in 'child.py' is as follows:

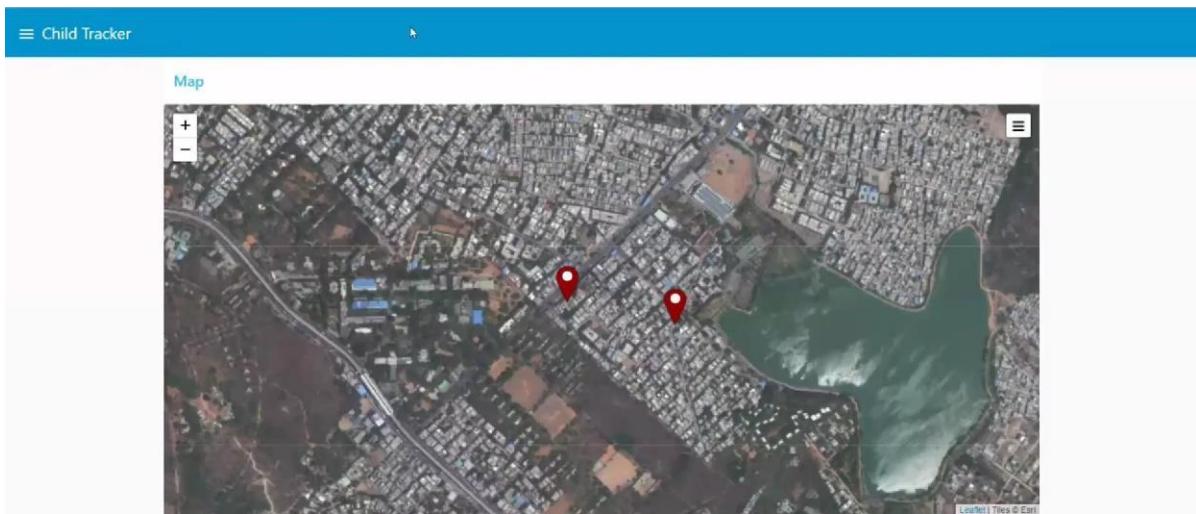

```

1 import json
2 import wiotp.sdk.device
3 import time
4
5 myConfig = {
6     "identity": {
7         "orgId": "hj5fmy",
8         "typeId": "NodeMCU",
9         "deviceId": "12345"
10    },
11    "auth": {
12        "token": "12345678"
13    }
14}
15 client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
16 client.connect()
17
18 while True:
19     name= "Smartbridge"
20     #in area Location
21
22     #latitude= 17.4225176
23     #longitude= 78.5458842
24
25     #out area Location
26
27     latitude= 17.4219272
28     longitude= 78.5488783
29     myData={'name': name, 'lat':latitude,'lon':longitude}
30     client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPub
31     print("Data published to IBM IoT platfrom: ",myData)
32     time.sleep(5)
33
34 client.disconnect()
35
36

```

The 'IPython console' window shows a continuous stream of messages indicating data is being published to the IBM IoT platform.

- After running the script, the web UI shows “Person is not in the particular area”

Result: Successfully developed the web application using Node-RED
