Define your problem statement

The suggested system uses sensors and a forecasting cloud to produce data that is extremely accurate about the health of the kids. We also employ cameras to keep an eye on the kids through a wide area network (WAN), which is visible in the web interface. This allows us to regulate the situation from a distance anywhere in the world. All sensors should be connected to the raspberry pi 3.3v vdd pin since MCP3008 is used in this project.

10 minutes
